

Grade 5

Week of 2026-08-24

Foundation

1. Write 6,742 in expanded form.
2. What is the value of the digit 8 in 18,543?
3. Compare using $<$, $>$, or $=$: 4.56 ___ 4.65 .
4. Round 7.849 to the nearest tenth.
5. Add: $24.7 + 18.5$.
6. Subtract: $62.4 - 35.8$.
7. Multiply: 13×47 .
8. Divide: $315 \div 15$.
9. Solve: $5 \times (3 + 4)$.
10. A student buys 6 pencils at \$0.45 each. How much does the student spend?

Coordinate Plane Basics

11. Write the ordered pair for point A at (2, 5).
12. What are the coordinates of point B at (7, 3)?
13. Point C is at (4, 8). Is it closer to the x-axis or the y-axis?
14. Point D is at (9, 2). Is it closer to the x-axis or the y-axis?
15. Plot point E at (1, 6). What are its coordinates?
16. Plot point F at (5, 2). What are its coordinates?
17. If you move 3 units right from (2, 4), what are the new coordinates?
18. If you move 2 units up from (3, 5), what are the new coordinates?
19. A point is 6 units to the right of the y-axis and 4 units above the x-axis. Write the ordered pair.
20. A point is 8 units to the right of the y-axis and 1 unit above the x-axis. Write the ordered pair.

Coordinate Applications

21. Point G is at (3, 7) and point H is at (3, 2). What is the distance between them?
22. Point J is at (1, 4) and point K is at (6, 4). What is the distance between them?
23. What are the two perpendicular number lines on a coordinate plane called?
24. A rectangle has vertices at (2, 3), (2, 7), (5, 3), and (5, 7). What is its length?
25. What is the width of the rectangle?
26. What is the perimeter of the rectangle?
27. Point L is at (4, 5) and point M is at (4, 9). Are they on a horizontal or vertical line?
28. What is the distance from L to M?
29. A robot starts at (0, 0), moves right 4 units, then up 3 units. What are the robot's final coordinates?
30. The robot then moves left 2 units. What are the new coordinates?

Practice and Application

31. A map shows a house at (1, 2) and a school at (1, 8). How far apart are they?
32. A store is at (3, 4) and a park is at (7, 4). How far apart are they?
33. A garden has corners at (2, 1), (2, 5), (6, 1), and (6, 5). What is the area?
34. What is the perimeter of the garden?
35. Point N is at (5, 6). If you move it 3 units down, what are the new coordinates?

- 36. Point P is at (2, 4). If you move it 4 units right, what are the new coordinates?
- 37. A square has vertices at (1, 1), (1, 4), (4, 1), and (4, 4). What is the side length?
- 38. What is the perimeter of the square?
- 39. A path goes from (0, 0) to (5, 0) to (5, 3). What is the total distance?
- 40. Multiply: 24×15 .

Mastery and Reasoning

- 41. A rectangle has vertices at (1, 2), (1, 6), (4, 2), and (4, 6). What is its area?
- 42. What is the perimeter of the rectangle?
- 43. Point Q starts at (3, 5), moves right 2 units, up 1 unit, then left 4 units. What are the final coordinates?
- 44. Explain what the x-axis and y-axis are and how they help locate points.
- 45. A shape has vertices at (2, 2), (2, 5), (5, 2), and (5, 5). Is this a square? Explain.
- 46. Divide: $432 \div 18$.
- 47. A recipe uses $\frac{2}{3}$ cup of sugar. How much sugar is needed for 4 batches?
- 48. Subtract: $8.6 - 3.45$.
- 49. Write the ordered pair for a point that is 4 units left of the y-axis and 3 units above the x-axis.
- 50. Explain how changing the order of coordinates in an ordered pair changes the location of a point.
